1. This opinion contains indications relating to the following items:

<input checked="" type="checkbox"/>	Box No. I	Basis of the opinion
<input type="checkbox"/>	Box No. II	Priority
<input type="checkbox"/>	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
<input type="checkbox"/>	Box No. IV	Lack of unity of invention
<input checked="" type="checkbox"/>	Box No. V	Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
<input type="checkbox"/>	Box No. VI	Certain documents cited
<input type="checkbox"/>	Box No. VII	Certain defects in the international application
<input checked="" type="checkbox"/>	Box No. VIII	Certain observations on the international application

2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/FR2004/002654

Box No. I Basis of this opinion

1. With regard to the **language**, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐

This opinion has been established on the basis of a translation from the original language into the following language

_____, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).

2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

- a. type of material

☐

a sequence listing

☐

table(s) related to the sequence listing

- b. format of material

☐

in written format

☐

in computer readable form

- c. time of filing/furnishing

☐

contained in the international application as filed.

☐

filed together with the international application in computer readable form.

☐

furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

Form PCT/ISA/237 (Box No. V) (January 2004)

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/FR2004/002654

Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

to one another between an injection configuration, in which the needle (5) protrudes from the protective sleeve (14) arranged around the syringe body, and a protection configuration, in which the needle (5) extends within said protective sleeve (14), the device comprising a trigger member (108) for triggering the change from the injection configuration (figure 3 without "protective cap (6)") to the protection configuration (figure 5) at the end of injection, the trigger member (108) being integral with the actuating head (8) of the piston (3), and in that it comprises an inhibitor member (21) able to occupy an inhibition position in which said inhibitor member (21) defines a first end-of-injection position of the piston (3) in which the trigger member (108) is unable to trigger the change from the injection configuration to the protection configuration and to be moved relative to this inhibition position in order to permit a second end-of-injection position of the piston in which the trigger member (108) is able to trigger the change from the injection configuration to the protection configuration, and in that, in its inhibition position, the inhibitor member (21) is connected to the piston (3) and integral with the movement of the latter and is able to cooperate in abutment with an element (7) of the device fixed relative to the syringe body (1) in order to define the first end-of-injection position, in that the inhibitor member (21) is able to be separated from the piston (3) or moved relative to the latter in order to allow the second end-of-

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

injection position to be obtained, and in that, in its inhibition position, the inhibitor member (21) is connected to the actuating head (8) of the piston (3).

Consequently, document D1 discloses all the features of claim 1 and in so doing deprives the latter's subject matter of any novelty, in accordance with PCT Article 33(2).

The same argument applies *mutatis mutandis* to the subject matter of independent claims **3 and 10**.

3. DEPENDENT CLAIMS **2, 4-9 and 11**

The claims do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step (PCT Article 33(2) and (3)). See for example:

3.1 Novelty

D1, page 13, line 30 - page 51, line 27, figures 3, 5 and 8, for claims 4-8;

3.2 Inventive step

The feature by which *the inhibitor member (34) passes through the head (12B) of the piston (12)* in claims **2, 9 and 11** is merely one of several obvious options that a person skilled in the art seeking to solve the stated problem might select, depending on each particular case, and without an inventive step

Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

being involved.

4 INDEPENDENT CLAIM 12

- 4.1 The solution proposed in claim 12 of the present application is not considered to be inventive (PCT Article 33(3)), the reasons being as follows:

The subject matter of independent claim 12 (the trigger member (52) is connected to the piston (12) and is able to be moved relative to the latter between a position permitting triggering ... and a position unable to permit triggering ...) refers to features representing merely one of several obvious options that a person skilled in the art seeking to solve the stated problem (namely that the change of the injection device at the end of injection in its protection configuration is not triggered systematically; see page 1, lines 33-36) might select, depending on each particular case, and without an inventive step being involved.

5 DEPENDENT CLAIMS 13 AND 14

- 5.1 Dependent claims 13 and 14 do not contain any features which, in combination with the features of any one of the claims to which they refer, meet the requirements of the PCT in respect of inventive step. This is because it would be obvious for a person skilled in the art to provide catch means on the trigger member and the piston in order to define their mutual positions as described in section 4.1 above.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/FR2004/002654

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

1. Although claims 1, 3, 10 and 12 have been drafted as separate independent claims, it appears that they have the same subject matter and that they differ only by virtue of a variation in the definition of the subject matter for which protection is sought and in the terms used to define their features. Therefore, these claims are not concise and, as such, do not meet the requirements of PCT Article 6.
